

Docker networking practical:

list networks

```
docker network ls
```

inspect bridge network

```
docker network inspect bridge
```

create custom bridge network

```
docker network create my_bridge_net
```

run container in custom bridge

```
docker run -d --name container1 --network my_bridge_net nginx
```

```
docker run -d --name container2 --network my_bridge_net alpine sleep  
300
```

test communication

```
docker exec -it container2 ping container1
```

host network

```
docker run
```
