

Unit 3 practicals

1st practical (23/4)

madanavenkatachaitanyakrishna@chinnu-3 ~ % docker compose version

Docker Compose version v5.1.0

madanavenkatachaitanyakrishna@chinnu-3 ~ % nano docker-compose.yaml

```
{
version: "3.9"
services:
  web:
    image: nginx
    ports:
      - "8080:80"
}
```

click control + o and then control + x

madanavenkatachaitanyakrishna@chinnu-3 ~ % docker compose up //starts all services

after this we'll see a welcome nginx page in port 8080

second practical

The terminal screenshot shows a sequence of commands and their outputs. It starts with an attempt to pull the 'wordpress:latest' image, which fails with an error: 'Error response from daemon: no matching manifest for linux/arm64/v8 in the manifest list entries: no match for platform in manifest: not found'. The user then debugs the error by running 'docker ai "help me fix this compose error"', which suggests running 'docker compose down' and 'nano docker-compose.yml'. The user follows these steps, removing the 'version' attribute from the compose file. Finally, the user runs 'docker compose up -d', which successfully pulls the 'wordpress:latest' and 'mysql:8.0' images, creates the 'docker-wordpress_default' network and 'docker-wordpress_db-data' volume, and starts the 'mysql-db' and 'wordpress-app' containers. The output shows the setup completed in 45/45 seconds.

```
❗ Image wordpress:latest Pulling 3.1s
Error response from daemon: no matching manifest for linux/arm64/v8 in the manifest list entries: no match for platform in manifest: not found

What's next:
  Debug this Compose error with Gordon → docker ai "help me fix this compose error"
madanavenkatachaitanyakrishna@chinnu-3 docker-wordpress % nano docker-compose.yml
madanavenkatachaitanyakrishna@chinnu-3 docker-wordpress % docker compose down
WARN[0000] /Users/madanavenkatachaitanyakrishna/docker-wordpress/docker-compose.yml: the attribute `version` is obsolete, it will be ignored, please remove it to avoid potential confusion
madanavenkatachaitanyakrishna@chinnu-3 docker-wordpress % nano docker-compose.yml
madanavenkatachaitanyakrishna@chinnu-3 docker-wordpress % docker compose up -d
[+] up 45/45
✓ Image wordpress:latest Pulled 165.1s
✓ Image mysql:8.0 Pulled 168.4s
✓ Network docker-wordpress_default Created 0.0s
✓ Volume docker-wordpress_db-data Created 0.0s
✓ Container mysql-db Started 0.6s
✓ Container wordpress-app Started 0.4s
madanavenkatachaitanyakrishna@chinnu-3 docker-wordpress %
